

Mandatory Water Conservation Measures Currently in Effect

Water Conservation Ordinance No. 1932 and Resolution 6245, declaring a Level 1 Supply Shortage, were adopted by the City Council on May 27, 2009. The following rules are now in place until further notice:

- Irrigation watering shall occur only after 5PM or before 9AM
- Irrigation shall not occur on Mondays and Thursdays
- Washing down driveways and sidewalks is prohibited except to alleviate safety or sanitary hazards
- Irrigation watering is limited to 15 minutes a day per irrigation station
- Water leaks and breaks must be fixed within three days
- Runoff from irrigation must not flow excessively onto the sidewalk, street, etc.

At this time, the City is not imposing water rationing or raising water rates.
